Introduction

This report provides 2011/12 data from the Disability Services National Minimum Data Set (DS NMDS). The DS NMDS collection is a set of nationally significant data items or pieces of information that are collected in all Australian jurisdictions and is an agreed method of collection and transmission.

The purpose of the DS NMDS collection is to facilitate the annual collation of nationally comparable data about specialist disability services, and to obtain reliable, consistent data with minimal load on the disability services field. Under the National Disability Agreement (NDA), Disability Administrators in all Australian jurisdictions are responsible for ensuring that DS NMDS information is comparable across all jurisdictions and years.

The DS NMDS provides information relating to disability funded service outlets and users of these services, including support needs of users and informal carer arrangements.

Why is the Data Collected

DS NMDS data has been used for a wide range of purposes including planning, national program evaluation and monitoring achievement of program objectives and agreed priorities. Specific examples of uses to which the data has been put include:

- Support training for future services delivery
- Provide national comparisons of numbers of service users living in institutional versus community-based settings.
- Indicate that certain groups of people (e.g. people of Aboriginal and Torres Strait Islander origin) are not accessing services as much as could be expected.

Full-year data about service users can also provide:

- A profile of all people receiving a funded service in a financial year
- Data on carer arrangements, which enables issues relating to ageing carers to be monitored and planned for
- Information about the quantity of services provided to some service users can be examined in relation to various characteristics of services users, such as their support needs, disability group, carer arrangements and whether they live in metropolitan or rural locations.

Acknowledgement

- The data provided in this report is based on the final 2011-12 DS NMDS data prepared by the Australian Institute of Health and Welfare (AIHW). Information is for South Australians only. The figures in this document do not include employment services, which is managed exclusively by the Australian Government.
- *For the purpose of this report, the reference to government refers to Disability Services only and non-government may include Local Government, other State Government agencies, for profit or not for profit organisations.*

In SA modified models of service were implemented to streamline the provision of service and response during 2011/12. Caution should be used if making direct comparisons between 10/11 and 11/12.

In 2011/12 there were also a number of organisations that under-reported clients, services received and service type outlet data.

Information in this report

This report is broken into four parts. Part one provides a profile of South Australia. Part two provides information using a two-way split to report government and non-government separately, while part three reports the data using three way split, identifying clients that are unique to government, non-government or those who received a service from both. Part four provides a comparison of the data over five years

For further information please contact Data Management and Reporting, Funds Management on 8415 4385

PART ONE – DISABILITY SECTOR PROFILE

This section details clients, services and service outlet information for all agencies and clients who were funded with NDA funding during the 2011/12 financial year.

SERVICE TYPE OUTLET INFORMATION

A service type outlet is defined as a unit of the funded organisation that delivers or coordinates a service type at or from a discrete location.

Total service type outlets

A total of 980 Service Type Outlets participated in the 2011/12 data collection – a decrease of 56 outlets from the 2010/11 collection.

Diagram 1: Service types by Service Category

Table 1: Service Outlets by Government Regions

Location Of service types outlets

The majority of service type outlets operating in 2011/12 were based in North and East Adelaide (45.2%), followed by 18.4% in South Adelaide and 12.75%.

Table 2: Outlets by service type

Sector responsibility

Of the 980 operational outlets, 234 (24%) were government and 746 (76%) were non-government

DISABILITY CLIENTS – DEMOGRAPHIC DETAILS

Clients can receive more than one service type during the financial year. Therefore, total clients are less than total service types provided in the reporting period.

In 2011/12 a total of 19,561 unique individuals with a disability were provided with a total of 37,870 funded services. This represents a 10.4% decrease in individuals and a 10.8% decrease in services from last year.

Country of birth

85% of clients were born in Australia.

Table 3: Country of birth

Country	Total Unique Clients		
	2009-10	2010-11	2011-12
Australia	17,961	18,737	16,666
England	758	783	700
New Zealand	111	106	93
Italy	178	189	161
Viet Nam	63	66	62
Scotland	103	126	99
Greece	89	93	77
Germany	99	94	107
Philippines	32	36	36
India	36	43	41
Other	758	828	769
Not Stated	596	721	750
TOTAL	20,784	21,822	19,561

Geographical location

25% of clients reside in Northern Adelaide, with 21% and 12% living in Southern and Western Adelaide respectively. 226 clients reported with an interstate postcode.

Table 4: Clients by Geographical location

Indigenous Status

4% (778) of clients reported were recorded as being Aboriginal and/or Torres Strait Islander.

Table 5: Indigenous Status

Indigenous status	Total clients
Aboriginal/Not TSI	762
TSI/Not Aboriginal	16
Both	100
Neither	1,7910
Not stated	773
TOTAL	19,561

Of the 778 indigenous clients, 59% were males and 41% were females.

Age by sex

Of the total clients, 10,978 (56%) were males and 8,583 (44%) females.

Table 6: Clients by age and sex

As in 2010/11, the most common age group for males was 10:19 and for females 50:59.

Source of income/labour force status

5,033 clients (25.7%) were less than 16 years where income source is not applicable. Of the 14,528 clients aged 16 years and over, 9,082 (62.5%) reported the Disability Support Pension as their main source of income. 4,027 (20.6%) were recorded with an income of not known or not stated. Of the 14,528 clients 16 years and over, 11,193 (76%) were not in the labour force.

Diagram 2: clients 15 years and over by labour force status.

Disability type

The most common primary disability type reported was intellectual (38%), vision (16%) and physical (13%). Secondary disability types were predominately physical, intellectual, neurological and speech.

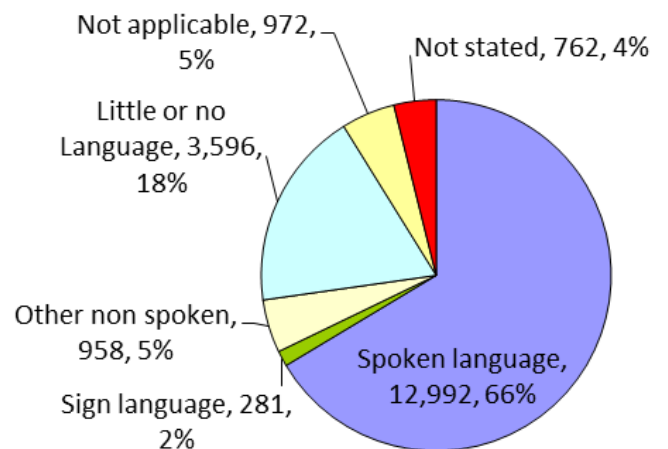

Table 7: clients by disability

Method of communication

66% of clients reported that their main method of communication was effective spoken language; 5% used other effective non-spoken language and 1% used sign language. 18% had little or no effective communication method.

Diagram 3: Method of communication

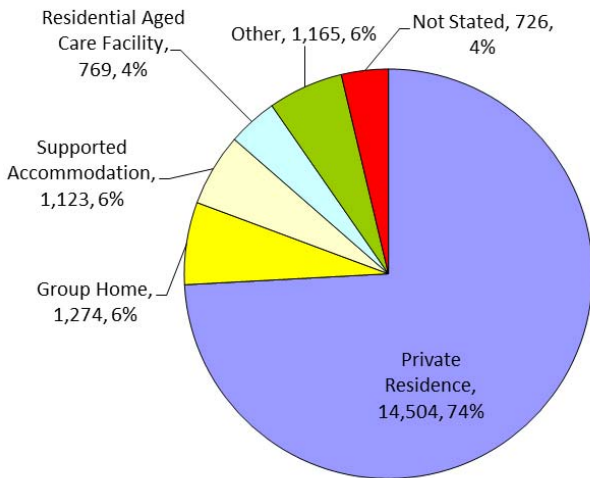

Interpreter services

The majority of clients (90%) did not require interpreter services. 2% and 4% required an interpreter for spoken and non-spoken communication respectively. 4% did not record a response for Interpreter Services.

Residential setting

75% of clients lived in a private home. 7% lived in group homes and 6% lived in supported accommodation.

Table 4: clients by residential setting

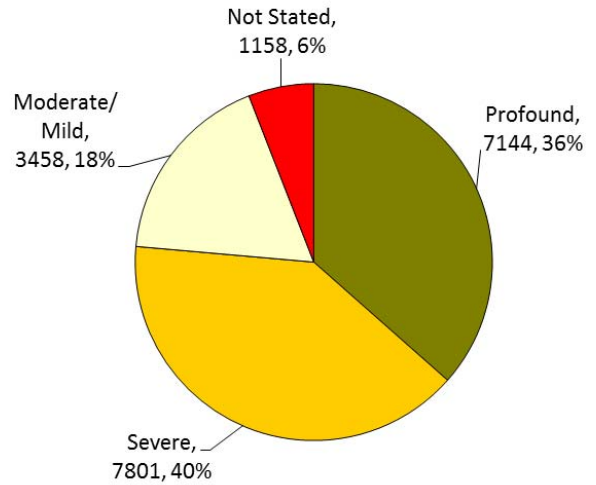

Living arrangements

78% of clients either live with family or other individuals, while 16% live alone. 6% have not stated a response.

Severity of disability

A total of 7,801 clients were reported as having a severe level of disability, while 7,144 were reported as having a profound disability.

Diagram 5: Severity of Disability

Note: the severity of disability assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

CARER INFORMATION

A total of 12,487 clients were supported by unpaid carers. Of those, 10,361 (83%) were identified as a primary carer, that is persons providing support with self-care, mobility or communication. 6,318 clients did not have a carer and 756 clients did not record a response.

Co-residency

Of the 12,487 clients supported by a carer, 6,6863 (74%) of them lived in the same household.

Diagram 6: Carer residency status

Age group of carer

The majority of carers (42%) were between 46 and 64 years of age. A further 39% of carers were between 25 and 44 years of age. 17% of carers were 65 years or over with only 1% under 25 years. 1% of carers were reported with and age group not stated.

Relationship with client

The majority of carers (7,727 or 61.9%) were identified as the mother of the client. Wife/Husband, male/female partners accounted for 14.5% of carers.

SERVICE TYPES PROVIDED

Of the 37,870 services reported for 2011/12, 20,296 (54%) were for community support. The majority of these services were made up of case management (8,257) and therapy support (4,435).

Table 8: Clients and services by service type.

Service Types	Unique Clients	Total Services
Large Institution	553	561
Small Institution	35	35
Hostels	15	15
Group Homes	1,259	1,318
Attendant Care/Personal Care	939	980
In Home Accommodation Support	2,653	3,153
Alternative Family Placement	80	80
Other Accommodation Support	37	37
Total Accommodation Support	5,150	6,179
Therapy Support	3,925	4,435
Early Childhood Intervention	1,186	1,271
Behaviour/Specialist Intervention	628	634
Couselling	1,764	1,823
Regional Resource Teams	2,346	2,406
Casemanagement	8,016	8,257
Other Community Support	1,314	1,470
Total Community Support	14,337	20,296
Learning and Life Skills Development	4,630	5,874
Recreation/Holiday Programs	2,474	2,927
Other Community Access	477	486
Total Community Access	6,624	9,287
Own Home Respite	332	338
Centre-based Respite	1,028	1,167
Host Family Respite	120	122
Flexible Respite	246	251
Other Respite	230	230
Total Respite	1,735	2,108

Note: individuals can receive services from multiple service types and/or service categories, therefore, the total clients should not be added. The total clients for each service type is unique client total for that service type. The total service category figure is unique across the particular service category.

Diagram 7: Services by category

Service type distribution

Of the 37,870 services provided in 2011/12 there were 15,563 services provided to clients by government and 22,307 services provided to clients by non-government organisations.

Diagram 8: government/non-government split

Total clients leaving the service

A total of 4,402 services provided to 3,865 clients were closed during the year. The main reasons why clients left the service type were 'no longer required – other' (43%), 'service user died' (13%) and 'other' 16%

Table 9: Service exit

Service exit reason	Total services	%
No longer required - moved to mainstream	138	3%
No longer required - other	1,891	43%
Moved to residential, institutional or supported accommodation	158	4%
Needs increased	139	3%
Moved out of area	534	12%
Service user died	577	13%
Service user terminated services	226	5%
Other	724	16%
Not stated	15	<1%

PART TWO – DS NMDS DISTRIBUTION BETWEEN GOVERNMENT AND NON-GOVERNMENT SECTORS

Note: The government and non-government client numbers are not unique to the relevant sector in this section and clients who received a service from both government and non-government sectors have been counted in both. The client numbers from each sector should not be added.

For the purpose of this report, the reference to government refers to Disability Services only and non-government may include local government, other State government agencies, for profit and non for profit organisations.

Section A reports DS NMDS information for government. Section B reports DS NMDS information for non-government organisations.

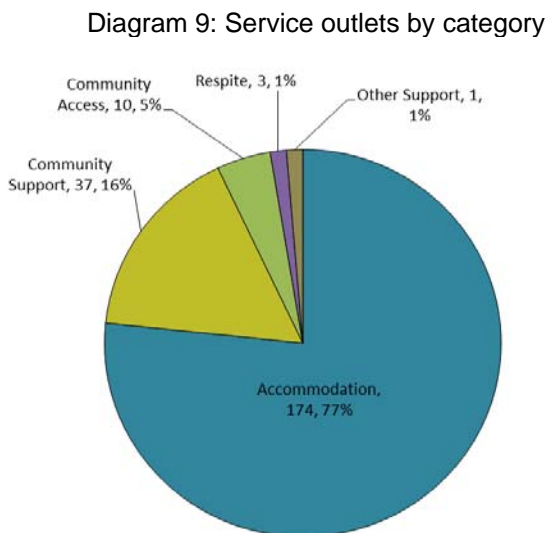

Of the 980 operational outlets, 227 (23%) were government and 753 (77%) were non-government.

Of the total clients reported who received a service in 2011/12 (19,561), 11,112 were provided with a service by the government sector and 12,429 were provided with a service by the non-government sector.

Section A: GOVERNMENT DS NMDS INFORMATION (DISABILITY SERVICES)

Service type outlet

Of the 227 government Service Type Outlets reported, 77% provided various types of accommodation support.

Location of service type outlets

The majority of service type outlets operating in 2011/12 were based in Northern Adelaide (37%), with 28% located in Central Adelaide.

Table 10: Outlet location by region

Operational details

DISABILITY SERVICES – CLIENT DEMOGRAPHICS

This section describes client demographics and services provided by Disability Services (government). In 2011/12 a total of 11,112 clients received a total of 15,541 services.

Country of birth

Most clients (91%) were born in Australia

Table12: Clients by country of birth.

Country	Total Clients
Australia	10,124
England	280
Italy	67
New Zealand	63
Viet Nam	45
Greece	40
Germany	37
Netherlands	37
Scotland	35
India	20
Philippines	18
Other	346
Totals	11,112

Indigenous status

565 (5%) of clients were recorded as Aboriginal and/or Torres Strait Islander. 57% were males and 43% females.

Table 13: Indigenous status

Indigenous Status	Total clients
Aboriginal/not TSI	461
TSI/not Aboriginal	12
Both Aboriginal and TSI	92
Neither	10,547
Total	11,112

Age by sex

6,546 clients (59%) were males and 4,566 (41%) females. The most common age group for males was 10 to 19 years and for females, 40 to 49 and 50 to 59 years.

Table 14: Clients by age and sex

Source of income/labour force status

2,959 (25%) clients were less than 16 years where income source is not applicable. 8,153 clients were aged 16 and over. Of these 83% of clients (6,839) identified the Disability Support Pension as their main source. Of the 8,153 clients 15 years and over, 6,559 (80%) were not in the labour force.

Diagram 10: Clients 15 years and over by labour force.

Geographical location

29% of clients lived in the Northern Adelaide region with 20% living in Southern and 13% living in Western region. Postcodes for 243 clients were recorded as 'not known' or 'not stated'.

Table 15: Geographical location

Disability type

The most common primary disability types reported were intellectual (54%) and physical (12%). Secondary disability types were predominantly intellectual, specific learning and physical.

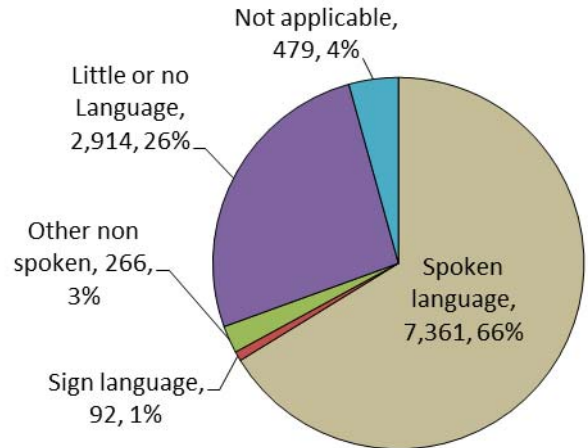

Table 16: Primary Disability type

Method of communication

66% of clients reported that their main method of communication was effective spoken language; 3% used other effective non-spoken language and 1% used sign language. 26% had little or no effective communication method.

Diagram 11: Communication method

Interpreter services

The majority of clients (94%) did not require interpreter services. 2% and 4% required an interpreter for spoken and non-spoken communication.

Residential settings

81% of clients lived in a private home. 5% lived in supported accommodation and 8% lived in group homes.

Table 17: Residential settings

Living arrangements

87% of clients either lived with family or with other individuals, while 13% lived alone.

Severity of disability

A total of 5,515 clients were reported as having a profound disability while 4,421 clients were reported as having a severe disability.

Diagram 12: Severity of disability

Note: the severity of disability assigned to each client is derived from their reported support needs in the areas of mobility, communication and self care.

DISABILITY SERVICES CLIENTS – CARER INFORMATION

A total of 9,043 clients were supported by an unpaid carer. Of those 7,300 (81%) were identified as a primary carer – that is persons providing support with self-care, mobility or communication.

Table 18: Carer

Existence of carer	Total	%
Yes, have an unpaid carer	9,043	81%
No, do not have a carer	2,069	19%
Total	11,112	100%

Co-residency

Of the 9,043 clients supported by a carer, 6,680 (74%) of them lived in the same household. Additionally, of the 7,300 carers identified as a primary carer, 726 lived in the same residence and were reported with an age of 65 years and over.

Relationship with client

The majority of carers (5,673 or 63%) were identified as the mother of the client. Partners of clients (wife, husband, male/female partner) account for 14%.

Age group of carer

82% of carers were between 25 and 64 years of age. A further 17% of carers were 65 years or over and 1% was less than 25 years.

DISABILITY SERVICES – SERVICE TYPES PROVIDED

Services by service categories

Of the 15,541 services provided by Disability Services, 14,196 (91%) were for Community Support. 7,304 (51%) of these were for case management.

Diagram 13: services by category

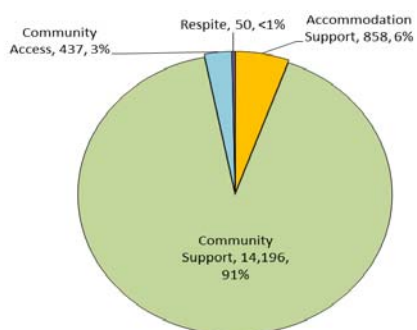

Table 19: Services by type

Service Types	Unique Clients	Total Services
Large Institution (>20 places)	259	267
Small Institution (<20 places)	6	6
Group Homes	534	564
Attendant Care/Personal Care	2	2
In Home Accommodation Support	19	19

Learning and Life Skills Development	68	77
Other Community Access	352	360
Total Community Access	419	437
Centre-based Respite	39	39
Flexible Respite	11	11
Total Respite	49	50

Clients leaving the service

A total of 2,625 clients comprising of 2,958 services left various service types during the year. The main reason why clients left the service type were 'no longer needs assistance from outlet – other' (64.4%), 'clients moved out of area' (15.7%) and 'other' (12.2%).

Table 20: Clients leaving service

Service exit reason	Total services	%
No longer required - moved to mainstream	42	1.5%
No longer required - other	1,766	59.7%
Moved to residential, institutional or supported accommodation	81	2.7%
User Needs Increased	10	0.3%
Moved out of area	449	15.2%
Service user died	263	8.9%
Service user terminated services	10	0.3%
Other	337	11.4%
Total	2,958	100.0%

Note: individuals can receive services from multiple service types and/or service categories. The total clients should not be added. The total number of individuals for each service type is a unique total for the service type. The total service category figure is unique across the particular service category.

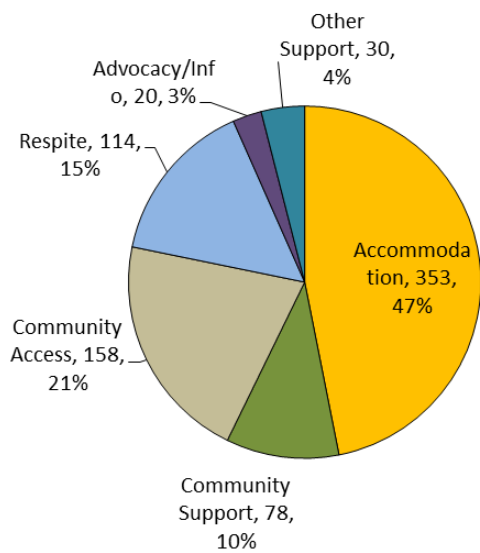

Section B: *NON GOVERNMENT DS NMDS INFORMATION*

This section describes service outlets, client demographics and services provided by the non-government sector. In 2011/12 there were 12,429 clients who were provided with a total of 22,329 services by non-government organisations.

NON GOVERNMENT SERVICE TYPE OUTLETS

Of the 753 non-government service type outlets that were reported, 353 provided various types of accommodation support with 60% being group homes.

Diagram 14: Outlets by category

Location of service type outlets

The majority (25%) of service types outlets operating in 2011/12 were based in the Eastern Adelaide region.

Other	514
Not stated, inadequately described	750
Total	12,429

Indigenous status

483 (4%) of clients were recorded as being Aboriginal and/or Torres Strait Islander. Of these, 69% were males and 31% were females.

Table 24: Indigenous status

Indigenous Status	Total Clients
Aboriginal/not TSI	442
TSI/not Aboriginal	8
Both	33
Neither	11,173
Not stated	773
Total	12,429

Age by sex

Of the total clients (12,429), 6,647 (53%) were males and 5,782 (47%) were females. The most common age group for males was 0 to 19 years and for females, 80 to 89 years.

Table 25: Age by Sex

Geographical location

23% of clients lived in the Southern Adelaide regions, with a further 22% living in the Northern Adelaide region. Postcodes for 753 (6%) were recorded as not stated.

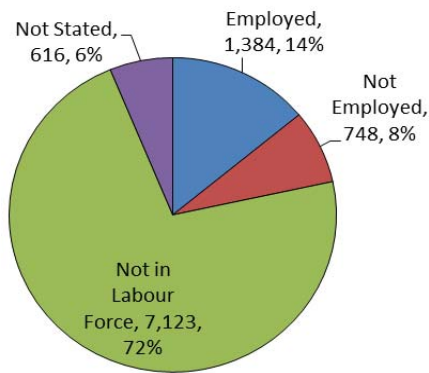

Table 26: Geographical location

Source of income/labour force status

21% (2,558) of clients were less than 16 years where income source is not applicable. For clients aged 16 years and over (9,706), 54% (5,264) identified the Disability Support Pension as their main source of income. 31% (3,055) of clients were recorded with an income of not known. Of the 9,871 clients 15 years and over, 7,123 (76%) were not in the labour force

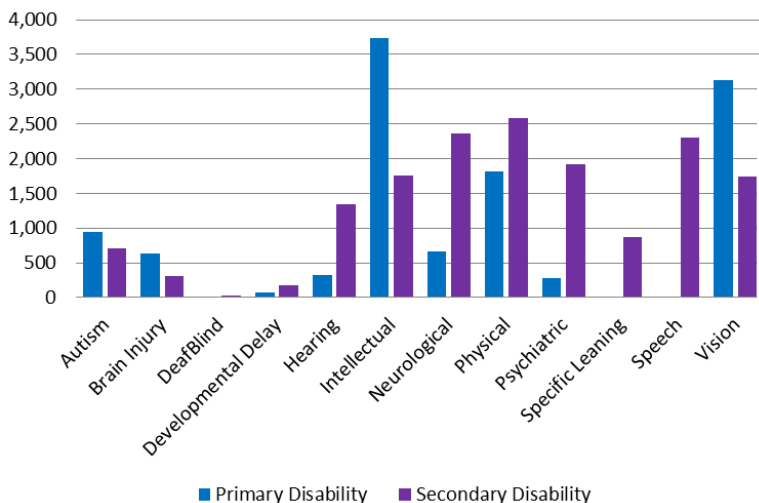

Diagram 15: Labour force status

Disability type

The highest primary disability types reported were intellectual (30%), vision (25%) and physical (15%). Secondary disability types were predominately physical, neurological and speech.

Table 27: Disability type

Method of communication

64% of clients reported their main method of communication as effective spoken language, 7% used other effective non-spoken language and 2% used sign language. 16% had little or no effective communication method.

Diagram 16: method of communication

Interpreter services

The majority of clients (86%) did not require interpreter services. 3% and 5% required an interpreter for spoken and non-spoken communication respectively.

Residential setting

69% of clients lived in a private home. 7% lived in supported accommodation and another 7% lived in group homes.

Table 28: Residential settings

Living arrangements

72% of clients either lived with family or with other individuals, while 19% lived alone. 9% were reported as not stated.

Severity of disability

A total of 5,006 clients were reported with a severe disability while, 3,637 were reported as having a profound disability and always needing assistance with activities of daily living.

Diagram 17: Severity of disability

Note: The severity of disability assigned to each client is derived from their reported support needs in the area of mobility, communication and self-care.

NON GOVERNMENT – CARER INFORMATION

A total of 6,835 clients were supported by an unpaid carer. Of those, 5,769 (84%) were identified as primary carers- that is persons providing support with self-care, mobility or communication

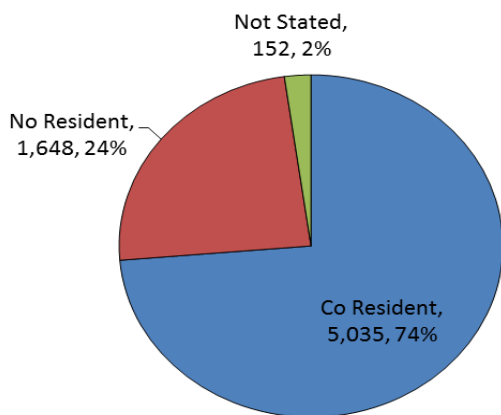

Table 29: Carer

Existence of carer	Total	%
Yes, have an unpaid carer	6,835	55%
No, do not have a carer	4,838	39%
Not stated	756	6%
Total	12,429	100%

Carer co-residency

Of the 6,835 clients supported by a carer, 5,035 (74%) of them lived in the same household. Of the 6,835 carers with a primary status, 677 were a co-resident with a reported age of 65 years or more.

Diagram 18: Carer co-residency

Carer relationship with client

The majority of carers (4,134 or 62%) were identified as the mother of the client. Partners of clients (wife, husband, male/female partners) account for 15% of carers.

Carer age group

The majority of carers (43%) were between 46 and 64 year of age. A further 35% of carers were 25 and 44 years and less than 2% were less than 25 years. 2% of carers were recorded with an age group of not stated.

Diagram 19: Carer age group

NON GOVERNMENT – SERVICE TYPES PROVIDED

Services by Categories

Of the 22,329 services provided no non-government clients, 36% were for Community Access and 30% were for Community Support. 4,576 (65%) of the 8,850 Community Access services provided were for Learning and Life style development.

Diagram 20: Services by category

Clients leaving the service

A total of 1,293 clients comprising of 1,444 services left the various service types during the year. The main reasons why clients left the service type were 'other' (26%) and 'service user died' (22%).

Table 30: Clients leaving

Exit Reason	Total services	%
No longer needs assistance - moved to mainstream	96	7%
No longer needs assistance - other	125	9%
Service user moved to accommodation setting	77	5%
User needs increased	129	9%
Moved out of area	85	6%
Service user died	314	22%
Service user terminated service	216	15%
Other	387	26%
Not stated	15	1%
Total	1,444	100%

Table 31: Clients and services by service type

Service types	Unique Clients	Total Services
Large Institution (>20 places)	294	294
Small Institution (<20 places)	29	29
Hostels	15	15
Group Homes	726	754
Attendant Care/Personal Care	937	978
In Home Accommodation Support	2,634	3,134
Alternative Family Placement	80	80

Learning and Life Skills Development	4,577	5,797
Recreation/Holiday Programs	2,474	2,927
Other Community Access	126	126
Total community access	6,288	8,850
Own Home Respite	332	338
Centre-based Respite	992	1,128
Host Family Respite	120	122
Flexible Respite	235	240
Other Respite	230	230
Total respite	1,695	2,058

Note: individuals can receive services from multiple service types and/or service categories. The total clients should not be added. The total number of individuals for each service type is a unique total for the service type. The total service category figure is unique across the particular service category.

PART THREE – CSTDA NMDS DISTRIBUTION BETWEEN GOVERNMENT, NON GOVERNMENT AND A COMBINATION OF BOTH

Clients may receive services from only a government agency, a non-government organisation or a combination of both. This section provides data that indicates unique clients who received services only from government, non-government or received services jointly from both.

For the purpose of this report, the reference to government refers to Disability Services only and non-government may include local government, other state government agencies, for profit and non for profit organisations.

Distribution of Clients reported

Data indicates that 19,561 individual clients accessed a funded service during 2011/12. Of these clients, 3,980 unique clients received services through both the government and non-government, while 7,132 clients received services only from government and 8,449 from non-government organisations.

Diagram 21: Unique client distribution

Level of severity

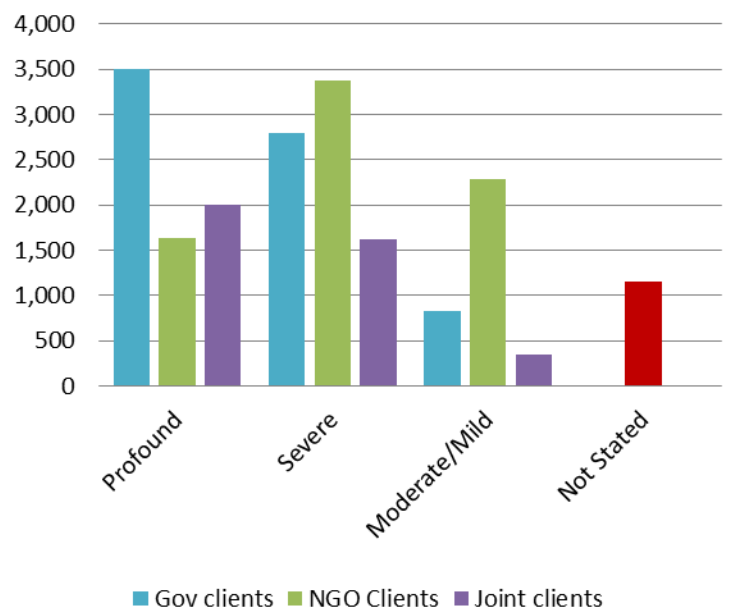

Joint government and non-government clients recorded the highest percentage of clients with a profound disability (50%).

For clients recorded as having a severe disability, there was only a small variance across the three-way split, with unique client within each category showing 39% and 40% for government and non-government respectively.

Not stated response were only identified for unique clients of non-government with 14% (1,158) of clients recording a 'not stated' response

For unique clients who receive a service from both government and non-government there were no 'not stated' responses.

Table 32: Severity of disability

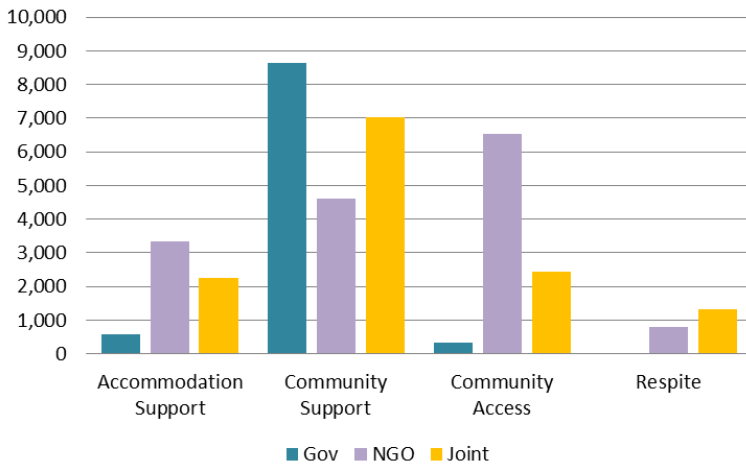

Note: The severity assigned to each client is derived from their reported support needs in the areas of mobility, communication and self-care.

Distribution of Services provided

Of the 37,870 services provided in 2011/12 there were 9,564 services provided to unique government only clients, 15,296 services provided to unique non-government only clients and 13,010 services provided to clients of both government and non-government.

Table 33: Services by category

Of the 15,296 services provided to unique non-government clients, 43% were for Community Access and 30% were for Community Support. 4,345 (66%) of the 6,540 Community Access services provided were for Learning and Lifestyle Development.

Of the 9,564 services provided to unique government clients, 90% were for Community Support. Of the 8,636 services provided for Community Support 69% were for Case Management and Regional Resource Teams.

Of the 13,010 services provided to clients who received a combination of government and non-government, 7,033 (54%) were for Community Support. Of the 7,033 Community Support services provided, 3,213 (46%) were for Case Management.

Table 34: Sector by service types

PART FOUR – CSTDA NMDS FIVE YEAR COMPARISON

The data provided is based on the financial 2007/08, 2008/09, 2009/10, 2010/11 and 2011/12 DS NMDS data prepared by the Australian Institute of Health and Welfare. Information is for South Australia only. The figures in this document do not include employment services, which are managed exclusively by the Australian Government.

SERVICE TYPE OUTLET DETAILS

The total number of all service type outlets participating in the data collections steadily increased between 2007/08 and 2011/12.

Of the total service type outlets that have been reported under the NMDS, accommodation has consistently remained the category with the highest number of service outlets.

Table 35: Service outlets by categories

Table 36: Location of outlets

State Region	Total Service Type Outlets			
	2008/09	2009/10	2010/11	2011/12
Adelaide Hills	20	28	25	25
Barossa	24	24	27	29
Eastern Adelaide	208	226	280	221
Eyre and Western	17	19	23	21
Far North	15	17	20	22
Fleurieu and Kangaroo Island	21	30	32	33
Limestone Coast	28	23	24	25
Murray and Mallee	26	28	39	34
Northern Adelaide	184	184	216	222
Southern Adelaide	137	138	184	181
Western Adelaide	106	92	120	125
Yorke and Mid North	22	26	34	39

Location of service type outlets

The majority of service type outlets operating during the five year comparison were based in the Eastern, Northern and Southern Regions.

DISABILITY CLIENTS – COMPARISON DETAILS

Clients can receive more than one service type during the financial year. Therefore, total clients are less than total services provided in the reporting period.

Individual unique clients have steadily increased since the data collection commenced in 2003/04. There has been 29.7% increase from 2003/04 (15,081 clients) to 2011/12 (19,561 clients)

	2008/09	2009/10	2010/11	2011/12
Total Unique Clients	20,145	20,784	21,822	19,561

Table 37: Indigenous status

Both	30	53	77	100
Neither	18,359	19,313	20,126	17,910
Not stated	946	630	757	773
Total	20,145	20,784	21,822	19,561

The most common age group for males has consistently been 0 – 19 years. For females the most common age groups has been 50 – 59 years.

The male/female ratio has remained relatively constant over the five years of the data collection.

Table 38: Male clients

Disability type

The proportions of disability types have remained consistent across the five years.

Table 41: Clients by primary disability

CARER DETAILS COMPARISON

There has generally been an improvement in the quality of the data relating to carers, with 'Not Stated' response rates reducing.

Table 42: Carer

Has Carer	2008-09		2009-10		2010-11		2011-12	
	Total clients	% of Total clients	Total clients	% of Total clients	Total clients	% of Total clients	Total clients	% of Total clients
Yes	11,068	54.94%	12,009	57.78%	12,374	56.70%	12,487	63.84%
No	8,080	40.11%	8,090	38.92%	8,671	39.74%	6,318	32.30%
Not Stated	997	4.95%	685	3.30%	777	3.56%	756	3.86%
Total	20,145	100%	20,784	100%	21,822	100%	19,561	100%

Co-residency

The proportion of co resident carers has increased over the five years, while the proportion on non-resident carers has remained similar for the last three years.

Table 43: Carer co-residency

The response rate for this question has increased significantly between the 2007/08 and 2010/11, however 2011/12 has shown a slight decrease in co-residency numbers. 241 clients did not state co-residency in 2007/08 compared to 152 in 2011/12.

Relationship with Client

The rate of 'not-stated' response has decreased dramatically from 2005/06 to 2011/12 with other categories largely stable. 'Mother' has consistently been reported as the main relationship of the carer.

Age group of Carer

Over the five years the 25 – 44 year age group has consistently been increasing.

Table 44: Carer age comparison
